The RC ecosystem describes the process of releasing each of its coins with rewards in the following utility tokens: RC1/USDT and Rc2/BUSD.

The RC1 Launchpad utility has passed all testing phases and is ready for audit, while the Rc2 utility will function as a coin listing website to attract project owners of their currencies and passing two audits.

RC1 services provide holders with access to presales and discounts, buyback/burn, and all money will be generated by the new-coins website.

PRESALE PHASE 2ND OF JANUARY, 2022

The presale is KYC and Audited to be launched by **Pinksale**.

Only RC1 holders with more than 1 million tokens can take part in the Rc2 whitelist presale.

RC1 and Rc2 holders will get a special discount from our Rc2 platform for using our services

RC1 holders will get access to special presales and discounts for using our RC1 services.

Buyback and burn will be already in Rc2 and any revenue that comes from website **new-coins.app** will be used to buyback and burn Rc2.

Also from the Launchpad a small % of the revenue will go to buy back and burn for rc1 token.

PROJECT EXPLANATION

The screenshot shows a news article from Yahoo Finance. The headline is "Reward Cycle Achieves \$2.2 Million Market Cap After Token Launch". The article is by Newsfile Corp. and was published on November 9, 2021. The text states: "London, United Kingdom--(Newsfile Corp. - November 9, 2021) - The Reward Cycle team is pleased to announce that the Company market cap has reached \$2.2 million, after the launch of its Reward Cycle token on October 31, 2021, using the BSC Chain." Below the text is a small image of a construction site with workers and a banner that says "REWARD CYCLE". The right side of the screen shows a "TRENDING" section with several news items.

Rc2's main purpose is to help RC1. Without RC1, there would be no Rc2. The RC Launchpad will use Rc2 as a lead-generating platform. Rc2 will be a new token voting platform, similar to the websites coinhunt, coinsniper, and coindiscovery, where most, if not all, project owners or their teams list new tokens and our platform Rc2.

Our Rc2 Website will create free leads for the RC1 Launchpad , which we will turn into sales. Rc2 will bring new clients and revenue to RC1, which is essential for RC1. All of that traffic will move to Rc2, increasing lead and ad revenue for Rc2 as well as having a direct influence on RC1 revenue. Aside from that, the Rc2 will purchase 3% of RC1 in order to support the latter's price rise. Rc2 will benefit holders of RC1.

For additional information, please visit our website or our [Reward Cycle Links](#) page.

The RC1 we burned was from [Pancakeswap](#), which is a massive difference, unlike if we were burning from a wallet supply.

At least in the current market environment, price volatility in digital markets seems to be higher than in traditional markets.

As a result, issuers must be able to develop a clear, effective, dependable, and attractive value proposition that fits inside the digital ecosystem in order to attract investors.

Buyback-and-burn Benefits The Issuer In Four Ways:

- › **To Begin**, Buyback-and-burn Strategies Promote The Increase And Price Stability Of A Token's Value After It Is Listed For Secondary Trading.
- › **Secondly**, Investors Will Be More Interested In The Token.
- › **Third**, Since The Secondary Market Demand For Trading The Asset On Exchanges Will Be Higher, Buyback-and-burn Results In Increased Liquidity. Reduced Price Volatility Is A Result Of Increased Liquidity.
- › **Fourth**, Buyback-and-burn Encourages Long-term Growth Investors To Hodl The Token, Contributing To The Asset's Price Stability.

That is the way the price will go up as well. For example, if you have 200 Million tokens in your wallet that were only before the launch; if you never bought and burned these tokens it would not make any difference. However, if you sell those people will lose money, yet burning them won't make much difference.

So that is why buyback/burn brings the price up while money goes into liquidity as well. The burned tokens will be sent to the dead wallet so the supply is going down.

Dead wallet address Bought and Burn 1.87 BNB 1.3 Million RC1 Token

- **The Differences between RC Launchpad and Others**

Some project Launchpads allow you to choose between the claimed rewards you earned on the dashboards. To claim these rewards you will pay fees as well as convert from volatile coins, such as BNB.

What makes RC different is when you hold Rc2 you will already receive three reward tokens. In addition, when we launch Rc3 in the future you will receive 9 rewards tokens. Finally, by holding Rc4 you will receive between 13-14 reward tokens.

In this sense, the RC ecosystem of reward tokens is better than choosing tokens because RC tokens are compounded as it grows.

With the RC ecosystem, the holder can buy Rc2 and receive RC1 automatically. So when someone holds RC3 they will be getting Rc2 and RC1 as well, including BUSD, USDT, and another token later to be named.

The ecosystem tokens were designed to help each other and were our plan, so even if no one is buying RC1, whenever someone buys Rc2 the buy order will trigger for RC1 through Rc2.

What are the Benefits of Holding all RC Tokens?

The advantages of owning the RC ecosystem tokens will be the rewards. The second will be the RC Tier system on RC Launchpad and Rc2 utility token listing website.

To utilize the RC Launchpad Services link your owner's wallet to the Launchpad.

If you wish to launch your token on the RC Launchpad once you link your wallet the system will automatically compute your discounts depending on your Tier and how many tokens you possess.

Just by holding the RC ecosystem tokens users receive discounts that they may spend on our services for AMA's as well as adverts on our website.

- **Services**

Presale setup fees
KYC checking fees
Contract Checked vetted by qualified developers
Ads on our Launchpad
Live AMA in our official RC Telegram group
25% of tokens in the next 7 days from presale and the remaining 25% the following week. As a result, users will receive all of the tokens in two weeks as BCS tokens.

What is so special about RC LAUNCHPAD?

The RC Launchpad is a platform to give prospective users access to a Launchpad specifically designed to help creators of new projects to distribute their tokens easily with or without vesting period while simultaneously raising capital for them. The Launchpad will be operative on the Binance Smart Chain and will be used to launch new IDO coins through PancakeSwap, a decentralized liquidity exchange.

KYC and Other Important Measurements

To give more credibility to new tokens launched on the Launchpad, the team has put the necessary machinery in place to vet and check tokens and accept only those from qualified developers.

That is beside the **“Know Your Customer” (KYC)** checks that will be performed on those tokens before they are listed for presale on their RC BSC Launchpad.

Reward Cycle's Reward

USDT is the reward for Reward Cycle's first token while BUSD is the second rewards token chosen through a voting process. To earn more rewards, crypto lovers will be required to hold more of the token.

According to the token's creator, **7%** of each buy and sell will be dedicated to holders as USDT reward while a further **4%** goes into liquidity. Another **4%** will be diverted into marketing, making a total of **15%** for several purposes.

RC1 AND RC2 PRODUCTS LIST

Need help with utilizing the Launchpad or setting up a presale? Our team can assist with presale set-ups to active holders and users

KYC involves several steps to: establish customer identity; understand the nature of customers' activities and qualify that the source of funds is legitimate

All of the contracts launched on the Launchpad are checked and vetted by our qualified developer team

Project owners will be able to utilize the ad space on our platforms to promote and for marketing their projects

Receive additional support by attending Live AMAs in RC Telegram group with over 6.6K or one of our partnership channels as when requested

To earn discounts on our platform to use RC services you need to purchase half million tokens or more

• SERVICES WE OFFER ON RC1:

1. Presale setup Discounts
2. KYC checking Discounts
3. Contract Checked vetted by qualified developers
4. Ads on our Launchpad
5. Live AMA in our official RC Telegram group
6. RC2 Platform discount for ads and promoted spots on the website for project owners who are holding RC1 and RC2

The Tier SYSTEM for RC1 Launchpad and Rc2 Utility Website:

- Tier 1: Size of holding for each degree of participation
First-tier holders will receive a **25% discount** on all of our services if they own **3 million tokens**.
- Tier 2: **2 Million Tokens** in the 2nd Tier entitles you to a **20% discount**.
- Tier 3: To earn a **10% discount** on our services, 3rd tier needs half a million tokens.

Half a million RC Tokens is the minimum purchase. There is no maximum purchase

- **What are the Plans for Rc2 After the Launch?**

We will manage the Rc2 Launch the same as the previous launch however on a greater scale as well as a **500 BNB SC** and **1000 BNB HC**. This demands significant marketing we mentioned in the Rc2 Roadmap.

After the Rc2 presale and launch, we will apply for CMC/CG and a significant exchange for the token. We may opt for a bigger exchange within 1-2 years such as Coinbase or Binance. As well as major marketing goals for billboards and well-known visitors.

Out of 1 billion circulating tokens, the overall supply for RC1 is at 728 million hence burning tokens will reduce the supply after launch faster with buyback/burns.

Our objective will be **RC1 to \$1** when the token takes off, as well as the RC Launchpad revenue from services, and frequent buy/backs we can lower the supply down to **400-500 million**. Our long-term objective will be RC1 to \$1 after such we will halt the burning.

Rc2 presale will be on the 2nd of January which will also accommodate businesses and families for the holiday season.

We are building brand awareness for Rc2. This will give us time for marketing and to research the polls we started today. Marketing to build brand awareness so more people will come and check out the Launchpad then ultimately they will invest.

Rc2 Contract Audit passed 12/22/21 by InterFi

Introducing RCLaunch Dapp

We are delighted to offer The RCLaunch Dapp. Our Reward Cycle team has been working hard to bring helpful applications and dapps to RC holders.

RC1 total rewards to Holders till now in USDT \$232k in 50 Days to our Holders. 🔥🔥🔥

You can do the following with our **New RCLaunch Dapp**:

Connect RC Wallet

Keep track of your total Rc1 rewards.

Collect Your Rewards

Keep track of your total USDT rewards (\$236K to date)

Monitor Rc1 and Rc2 Balances

Monitor Current BNB Prices

Keep track of your BUSD rewards

Highlights include

The dapp displays the pending balance for your rewards.

The dapp allows you to keep track of your accumulated rewards since your last transaction.

RC1 & Rc2 dapps and dashboard RCLaunch dapp audit was done by the same dev who did the contract for Rc2 as well as the dapp.

RC Launchpad demo was done on 12-16-21 for the final Testnet then shortly transferred to the Mainnet.

The Launchpad is free to use to test token launches but will only be available for public use after the audit. As soon as the audit is done we will public launch.

Thank you for contributing to your token, Reward Cycle.

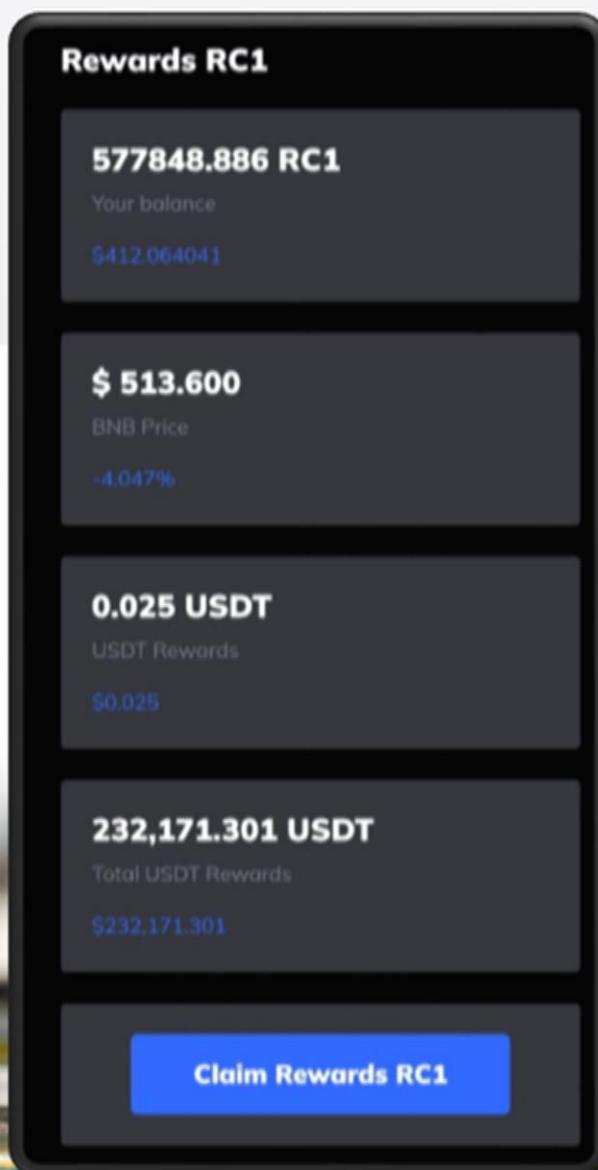

!Do not connect your RC to any other website or dapp browser other than RewardCycle dApp to view rewards or receive more tokens.

More information at our Telegram group or Discord group.

The **RCLaunch dApp** securely keeps track of users' *Rc1 & Rc2*, USDT, and BUSD Rewards.

The dapp displays the pending balance for your rewards. The dapp allows you to keep track of your accumulated rewards since your last transaction.

Thank you for contributing to your token, Reward Cycle.

Do not connect your RC to any other website or dapp browser other than dapp.rewardcycle.club to view rewards or receive more tokens
